Relief Action Surgeons4Surgeons

UKRAINE

## THE FIRST HALF OF THE YEAR 2022 RUSSIAN-UKRAINE WAR

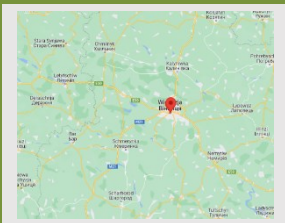

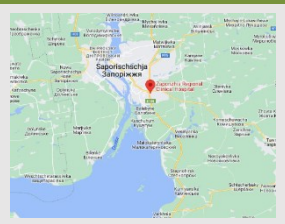

War between Russia and Ukraine began on February 24, 2022. The non-profit association Green Value Helps was entered in the register of associations on March 17th, 2022 and immediately reacted to the precarious situation in Ukraine.

Due to the personal contacts to German doctors and hospitals, Green Value Helps set up the Surgeons4Surgeons aid campaign together with Dr. Mykolai Filippovych and Chief Physician Prof. Dr.med. A. Hofmann and subsequently carried on in supporting the aid campaign.

Dr Mykolai Filippovych was born in Kyiv and studied medicine in Ukraine. He came to Germany in 2013 to carry out his dream of becoming a surgeon. In Germany he completed his specialist training in the Clinic for Trauma Surgery and Orthopedics 1 of the West Palatinate Clinic in Kaiserslautern and is currently undergoing further training in "Special Trauma Surgery" with Prof. Dr.med. A. Hofmann in Kaiserslautern.

The Surgeons4Surgeons project supports two hospitals in Ukraine - the Regional Clinical Hospital in Zaporizhia and the Military Hospital in Vinnytsia. Mykolai Filippovych is in direct contact with both hospitals and made phone calls with both Dr. Olga Bohdan and Dr. Oleksandr F.

## EVERY CENT COUNTS - HOW YOU BECAME A PART OF SOMETHING BIG

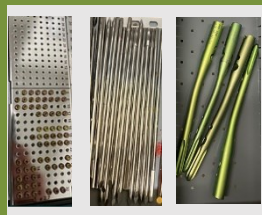

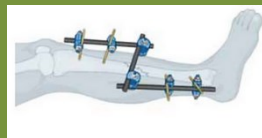

In view of the rapidly increasing number of injured and wounded since the beginning of the war, there is a great need for special supplies in both hospitals. The current situation poses great challenges for the trauma surgeons on site due to the lack of material. In addition, the increasing number of patients makes it difficult to provide adequate care and treatment for the injured.

Shortly after the beginning of the war, the hospitals' own stocks of fixators-external systems, jet lavage and vacuum bandages were used up and an urgent need was reported. These "supplies" are needed in connection with the treatment of broken bones and to treat open and contaminated wounds.

As a result, many patients can be treated quickly and effectively in a very short time with scarce resources. In addition, broken bones can be treated not only provisionally with a fixator external holding system, but in many cases also permanently with low risks.

Furthermore, by using the so-called jet lavage, a dirty wound can be cleaned quickly and effectively. With a vacuum bandage, infected and dirty wounds can be neatly bandaged after surgical cleaning, thereby greatly reducing the risk of infection. Such a bandage can be life-saving for many wounded

A "supply" in the simplest version costs between EUR 500 and EUR 1,000. These are already greatly reduced purchase prices, since the suppliers support the aid project and sell the products to us at significant discounts.

## WHY WAS THE DONATION COLLECTED THROUGH GREEN VALUE HELPS?

The Westpfalz-Klinikum Kaiserslautern needed an aid organization that could handle the purchase of the aid supplies quickly and unbureaucratically, as it does not have the infrastructure itself and the companies in the implant sector do not sell to private individuals without extensive preliminary checks. Furthermore, as a non-profit public institution, the clinic may not make monetary donations or make product purchases or sales.

## WHAT DISTINGUISHES GREEN VALUE

The Green Value association supports charitable projects in which the need is specifically named and the implementation is transparent for all donors. Green Value is particularly proud of the fact that all the money donated (down to the last cent) goes to the aid project. Neither administration nor overhead fees or additional costs are borne by our projects.

## Special Thanks

Dear supporters,

In the last six months you have helped with your donation and have done good deeds.

With your part of total

**EUR 10.919,34**

you not only saved lives, but also improved the quality of life for war victims and brought hope to the people of Ukraine.

Green Value Helps thanks you for your trust. Many things would not have been possible without you.

We would also like to express our special thanks for the generous donations in kind to the following institutions

 <p>Fa. Marquardt Medizintechnik GmbH</p>	 <p>Vinzentius-Krankenhaus Landau</p>	 <p>ZENIT Praxis Maxdorf</p>
 <p>Westfalz-Klinikum Kaiserlautern</p>	 <p>Fa. Depuy-Synthes</p>	 <p>Marienhau Klinikum Mainz</p>
 <p>Klinikum Idar-Oberstein</p>	 <p>St. Marien- und Annastiftskrankenhaus, Ludwigshafen am Rhein</p>	 <p>Dr.med. Hamid Huschmand N</p>
 <p>Diakonie Krankenhaus - Bad Kreuznach</p>	 <p>Fa. Osartis GmbH</p>	 <p>Rotary Club Kaiserlauter- Kurpfalz</p>
